How to fold your mini zine

1. Print the sheet at Actual size (100%), landscape, one side only.

2. Fold it in half the long way (hot-dog fold) with the printing outside, crease, and open it again.

3. Fold it in half the short way, then fold each half back to the middle, so the creases make eight panels. Open it.

4. Fold it in half the short way again and cut along the middle crease from the fold to the next crease only: the red line.

5. Open it, fold it the long way with the printing outside, and push the two ends together so the cut opens into a diamond.

6. Flatten it into a booklet with the front cover (page 1) on top, and crease the spine.
